# ❖ Drive Student Success at Scale

Holistically Capture and Evaluate the Experience of Students, Alumni, Faculty, & Staff

# ❖ Student Sentiment at a Glance

## Not all Machine Learning Solutions are Built the Same

While Machine Learning (ML) Feedback Analytics helps automate the discovery of actionable insight from open-ended comments, most market solutions use a generic one-size-fits-all approach that focuses on sentiment polarity outside of the academic context.

## Feedback Analytics Specifically Built for Learning

Our Feedback Analytics solution specifically caters to the student journey, tying it to institutional priorities or the employee journey, tying it to business priorities. This means that when analyzing comments, Explorance MLY algorithms categorize the qualitative feedback into higher education relatable terms.

### Deeper Insights

Trust the only ML solution modeled on real student comments and its ability to evolve and adapt to changing academic themes.

### More Insights

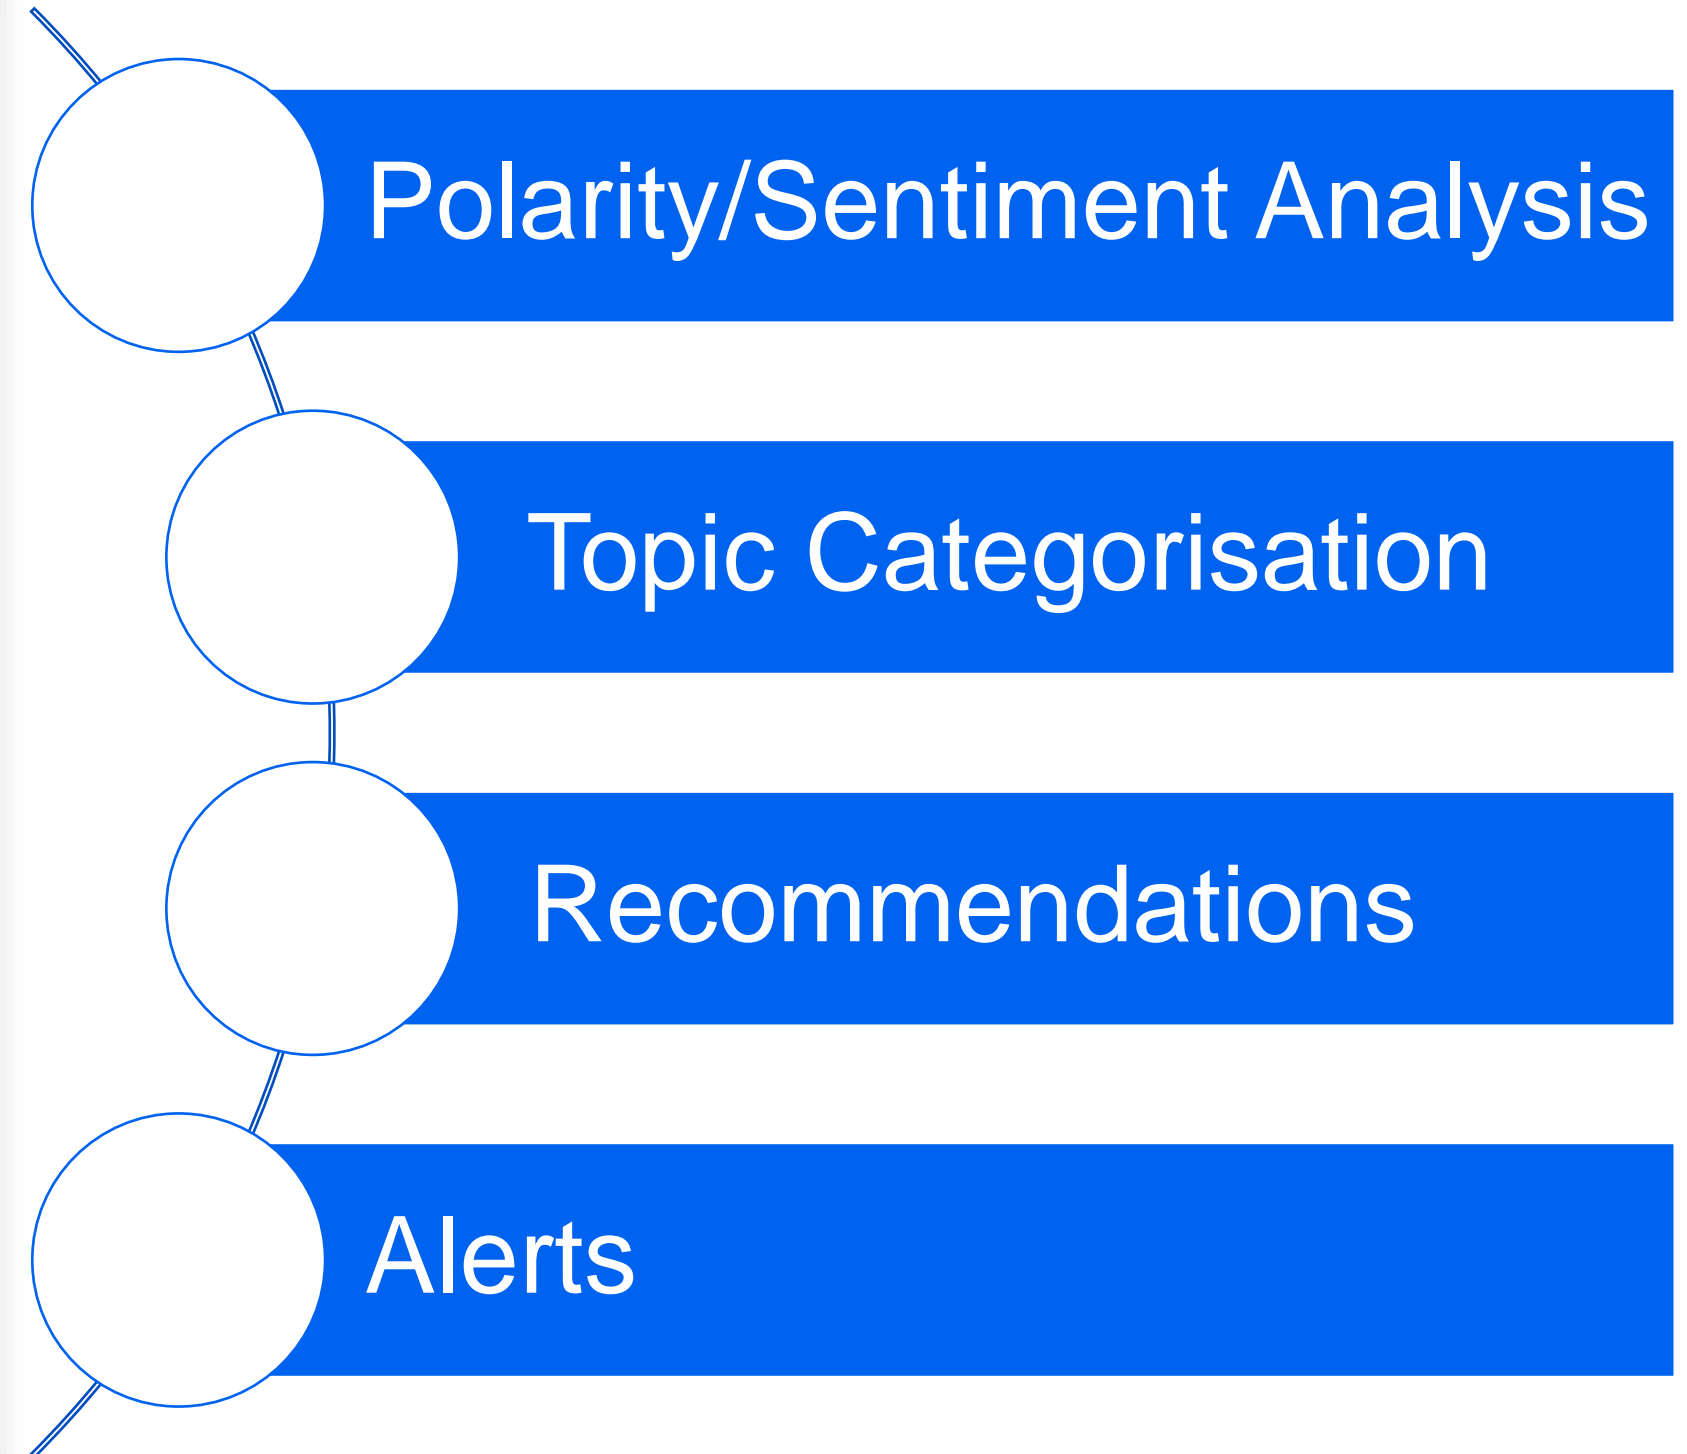

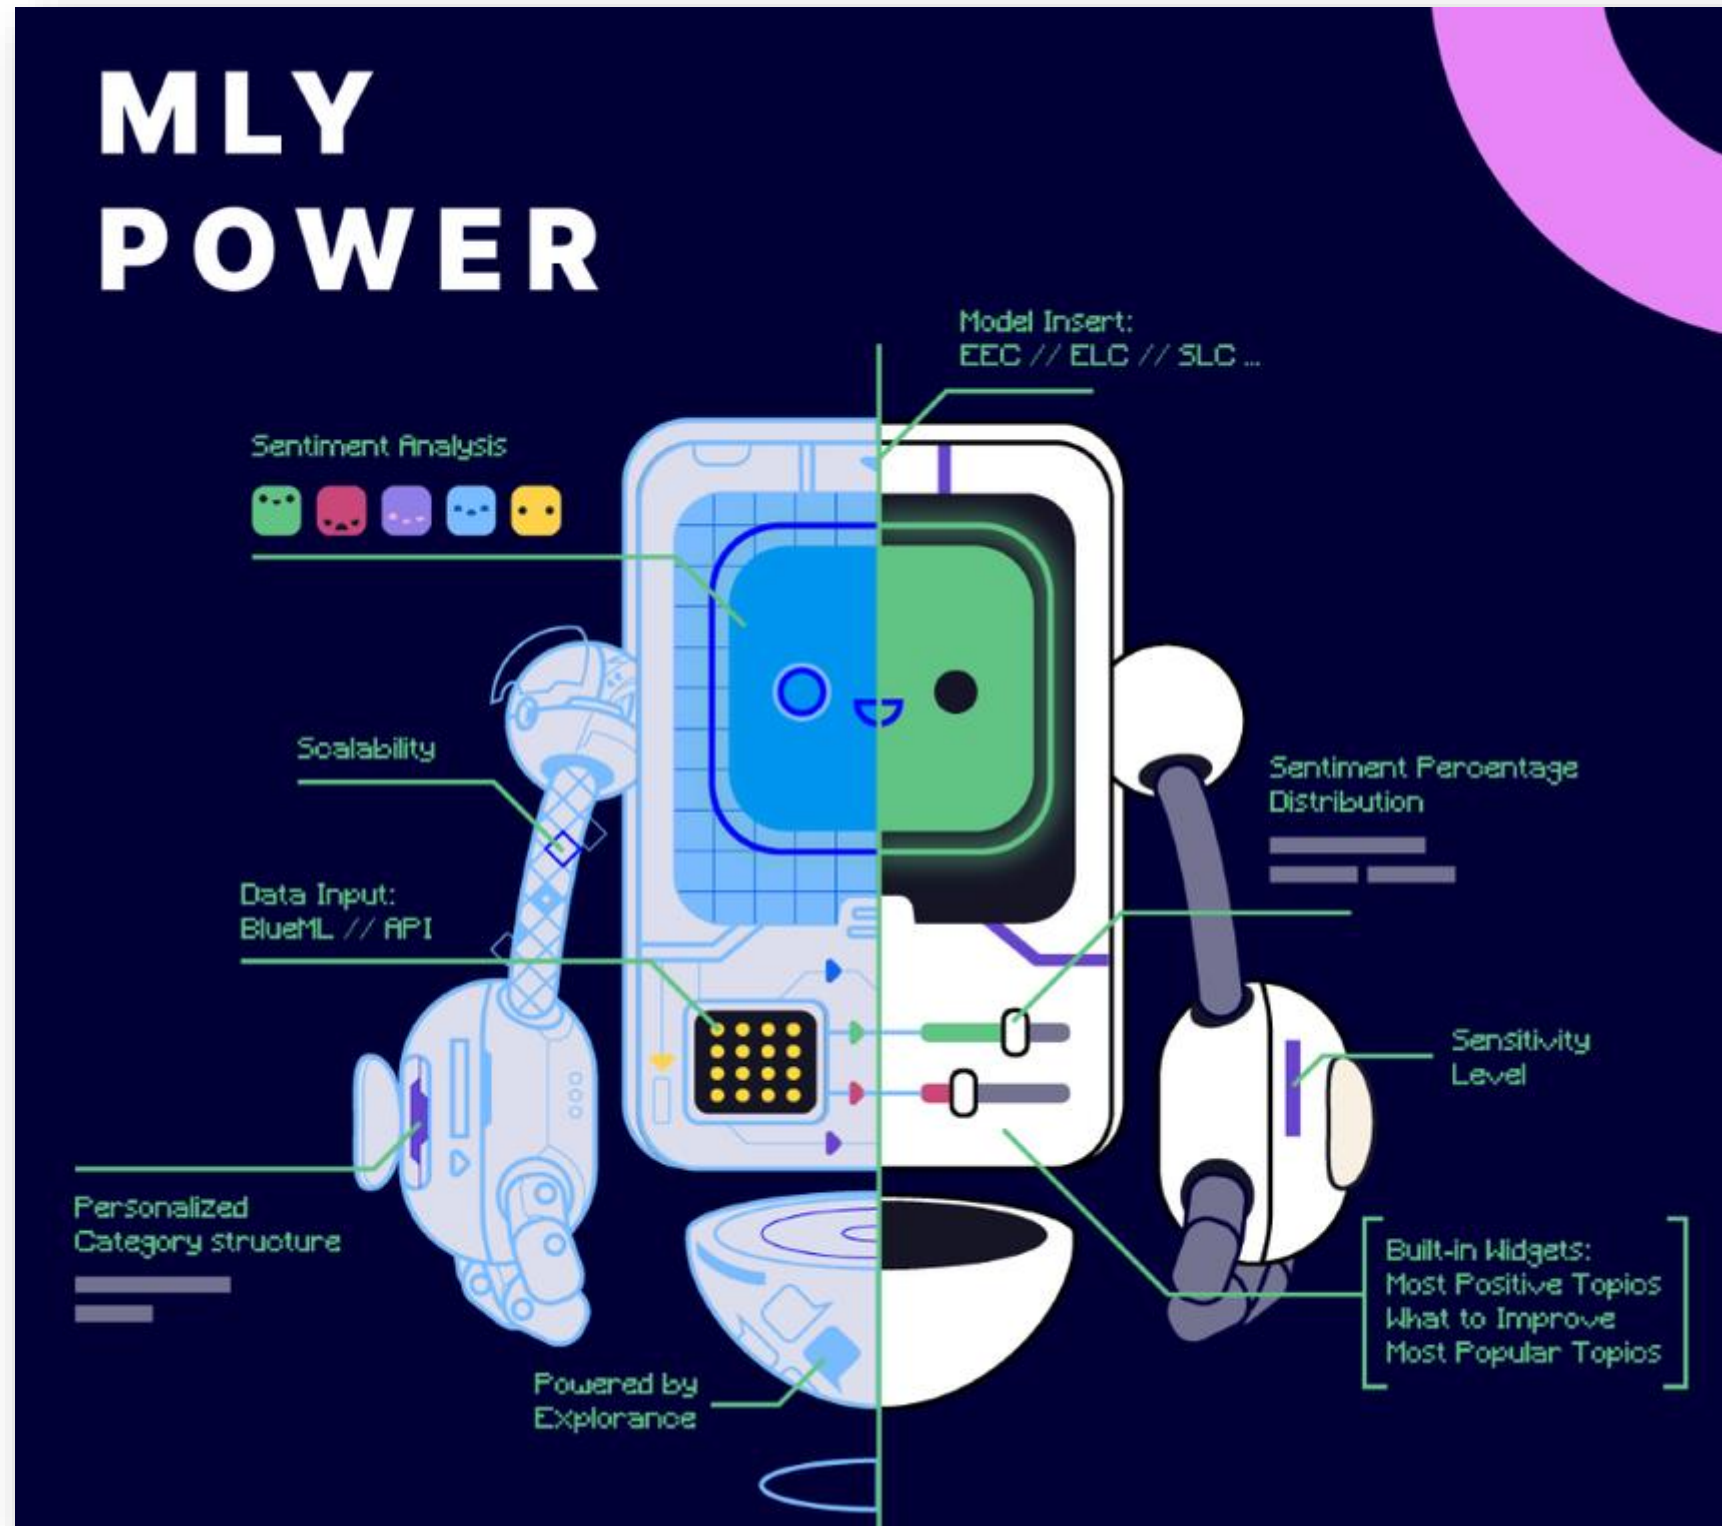

Analyze comments from anywhere, like internal surveys or external review sites, without being attached to a specific platform.

### Beyond Insights

Uncover recommendations as prescribed by your own students, so you can focus on what to start, stop or continue doing.

“The web development assignment was enjoyable, however introducing it in week 11 during exam preparation meant I couldn’t invest as much time in it as I would like. Highly advise continuing the assignment in the future but enabling students to work on it beginning week 1 when there is more time to work on it. The workshops however were challenging.”

- 1 The first part indicates positive sentiment around the web development assignment.
- 2 The second part provides indicates a negative sentiment on assessment timing.
- 3 The next sentence indicates a positive sentiment around the engagement in the assignment.
- 4 This sentence continues to provide a recommendation for the institution to consider.
- 5 The final sentence indicates negative sentiment around the workshops and their difficulty.

# MLY Comment Analysis

*“Examples of what was expected was very helpful especially because there was such specific expectations. Being able to choose our own topics was great. I appreciate that in the prep there were videos and readings. I appreciated the feedback I got from the faculty grading my assignments, it was in depth and useful. The institution needs to reduce tuition fees since students are remote and don't have access to campus services during the pandemic.”*

## MLY Comment Analysis

Dr. XXX is amazing. She's funny, extremely intelligent, and caring. She is really rooting for all of her students. She wants us to succeed, and she gives us so many tools to help us succeed. Her lectures are engaging and informative. Her course materials are excellent and good as study aids. The fact that she constantly ties the material back to the nursing profession helps me understand how to apply it.

## MLY Comment Analysis

There has been a degree of disorganisation in relation to the timetabling of classes and deadlines for my course in particular, as the Civil Engineering Department has not always taken into consideration my commitments for the modern language part of my degree. Most of the teaching has been very good, but there still are a few lecturers who do not respect or really care about the students and provide a lazy level of teaching. Sometimes the workload is also too much.
